App Foundation v2.1

Founder Refinement Pass

v2 is accepted as the preferred direction. This pass keeps everything that landed and sharpens the seven details standing between it and implementation — copy, tone, labels, Today's daily robustness, honest progress language, a quieter subscription, and a build order.

LOCKED FROM V2 — NO CHANGE

Plex Arabic · Ascent Bar · Momentum color
· Today command center · تنشيف / goals
· محافظة / تضخيم · Active Workout dark ·
ملفك التدريبي · Progress Brief

REFINED IN V2.1

Welcome copy · Arabic tone (MSA-leaning)
· final tab labels · Today × 3 states ·
Progress hedged language · quiet
Qimmah+ · implementation slice

SEVEN REFINEMENTS + BUILD PLAN

01 Welcome copy · 5 options	02 Arabic tone rules
03 Final tab labels	04 Today · 3 states
05 Progress · honest language	06 Profile · quiet Qimmah+
07 Implementation slice	08 Final decision table

01 Welcome — copy exploration

Five options tested against the brief's tone: Arabic-first, clear, modern — not hype, not too poetic, not too plain. Scored on clarity, energy, rhythm, and how well they carry a strong second line.

دَرْب بوضوح. تقدّم بثقة.

CHOSEN

"Train with clarity. Progress with confidence." Two balanced verbs, real rhythm, confident without hype. Owns the brand promise (clarity) and the emotional payoff (confidence).

clarity ●●●

energy ●●●

rhythm ●●●

خطوتك التالية أوضح.

Calm, continuous with v2. Strong — but a statement, not a call; slightly softer energy for a first screen.

كل تمرين له اتجاه.

"Every workout has a direction." Concept-driven and distinctive, but more abstract — better as a marketing line than an opening promise.

قِمة تنظّم تمرينك وتغذيتك — خطوة بخطوة.

Most explicit about what the app does. Clear, but reads as a description; longer and less memorable as a hero.

دَرْب، سجّل، تقدّم.

"Train, log, progress." Punchy three-verb rhythm mirroring the product loop; a very close runner-up — kept as an onboarding/marketing line.

Q I M M A H

قِمْة

درّب بوضوح.
تقدّم بثقة.

تمرينك وتغذيتك وتقدّمك في مكان واحد –
بالعربية، وبخطوات واضحة.

Welcome · chosen copy in place

02 Arabic tone rules

The voice moves one notch toward clean, pan-GCC Modern Standard Arabic — still warm and human, but professional and widely usable across Saudi and the wider region. We keep short active verbs; we drop heavy local colloquialisms that could read as too casual.

Warm, clear MSA — **not stiff, not street**. If a phrase would sound out of place in a national health campaign, it's too casual. If it would sound out of place between two friends at the gym, it's too stiff. Aim for the middle.

WAS • too casual	NOW • v2.1	WHY
وش هدفك الحين؟	ما هدفك الآن؟	“وش/الحين” are Gulf-spoken; MSA reads professional yet still warm.
نبني جدولك	لنُعدّ جدولك	Collaborative and clean; avoids the dialectal clip.
وين وكيف تتمرن؟	أين تتمرن؟ وكيف تفضّل؟	“وين” → “أين”; splits into two clear, calm questions.
خطتك تتكوّن	يتم إعداد خطتك	Reads as a system status, calm and trustworthy.
تقدر تغيّره وقت ما تبي	يمكنك تغييره في أي وقت	Same reassurance, neutral register for all users.

DO

AVOID

- Short active verbs: ابدأ · سجل · أضف · تابع
- MSA that any Arabic speaker reads instantly
- Warmth through encouragement, not slang
- Numbers & units stay precise and consistent

- Spoken Gulf markers: وش · الحين · كذا · تي
- Over-formal classical that feels like a textbook
- Hype & exclamation stacking
- Guilt or pressure phrasing

03 Final tab labels

Final labels resolve two v2 weak spots: **الغذاء** named a noun (“food”) rather than the practice, and **تقدّمي** was possessive-casual (“my progress”). The set is now consistent plural/verbal nouns — parallel, neutral, professional.

- اليوم** unchanged — the daily hub.
- التمارين** plural — the library/plans, clearer than التمرين.
- تسجيل** center action — “log”, verb-noun, universally understood.
- التغذية** the practice of nutrition, not الغذاء (the food itself).
- التقدّم** neutral noun; drops the possessive of تقدّمي.

اليوم • التمارين • +تسجيل • التغذية • التقدّم

04 Today — stress-tested across the day

✓ Readable in 3s

One hero decision owns the top third; eye lands there first, always.

✓ Useful daily

The hero & nudges rewrite by time-of-day and what's already done.

✓ Track is legible

4 labelled pillars with % — concrete, not an abstract graphic.

✓ Nudges act

Every nudge has a verb and a destination — never a dead stat.

✓ Works with no data

New-user state guides setup instead of showing empty rings.

NORMAL DAY • NEW USER (LOW DATA) • AFTER WORKOUT

1 · Normal day
full data · mid-day

2 · New user · low data

guides setup, no empty rings

3 · After workout

hero shifts to recovery + fuel

05 Progress — honest, hedged language

The Brief keeps its power but loses false certainty. Data over two weeks is a *signal*, not a verdict — so the copy hedges: “يبدو أنك...”, “تقديري”, “يحتاج قياس جديد”. Trust comes from admitting what we don’t yet know.

WAS • OVERCONFIDENT

NOW • HONEST

أنت في المسار الصحيح
نسبة دهونك 18%
حرق 320 سعرة

يبدو أنك في المسار الصحيح
نسبة الدهون ~18% · تقديري
حرق تقديري ~320 سعرة

PROGRESS HOME • WEIGHT DETAIL • STRENGTH DETAIL

Progress home • hedged Brief

يبدو أنك... • تقديري

Weight detail

fat % • "تقديري" goal band

Strength detail

per-lift ladders · honest read

06 Profile & a quieter Qimmah+

ملفك التدريبي stays as the earned-identity header. The one change: Qimmah+ moves from a filled ember block to a **single restrained line** at the bottom of settings — present, honest, never pushy or early. Upgrade is offered where the value is proven, not on the profile's front door.

PROFILE • SUBSCRIPTION PLACEMENT

ملفك التدريبي • Profile
Qimmah+ is one quiet line

QIMMAH+ PLACEMENT RULES

- ✓ One quiet line at the base of profile — text + “اعرف المزيد”, no filled block.
- ✓ Offer *in context*: when a user opens deeper analytics or a 5th weekly plan — where the value is visible.
- ✓ Honest framing: “خطط وتحليلات أعمق” — no fake scarcity, no countdowns.
- ✗ Never a home-screen banner, modal on launch, or locked core logging.
- ✗ Never shown in the first sessions — earn trust before asking.

FREE VS QIMMAH+

Core stays genuinely free: full logging, plan, active workout, basic progress. Qimmah+ adds depth (advanced analytics, extra programs, data export bundles) — an upgrade, never a paywall on the essentials.

07 Implementation slice

The order that de-risks fastest: tokens first (invisible, reversible), then the spine users touch every day. Each slice is shippable and independently valuable — nothing waits on a big-bang redesign.

0	Tokens — Plex + Momentum v2 Font swap, color-usage laws, spacing/radius/motion tokens. Invisible, fully reversible.	start here
1	Welcome + auth Chosen copy, sign-in / create account. First impression, low risk.	1 screen group
2	Onboarding — goal / setup / equipment تنشيف/محافظة/تضخيم + plan-building questions. Feeds everything downstream.	4 screens
3	Today command center The daily anchor + 3 states + Quick Log. The screen users open most.	hero surface
4	Active Workout Dark mode, set logging, rest, complete. Highest-value product moment.	crown jewel
5	Nutrition hero Goal-driven day view + fast logging + barcode. Daily habit loop.	habit loop
6	Progress Brief The Brief + trend detail. Retention driver; benefits from real logged data first.	retention

Profile, settings, meds, and states ride alongside — they reuse the same components and don't gate the spine.

08 Final decision table

ITEM	v2.1 DECISION	STATUS
UI typeface	IBM Plex Sans Arabic	kept · confirm
Welcome copy	درّب بوضوح. تقدّم بثقة.	new · approve
Arabic tone	warm MSA · no Gulf slang	new · approve
Tab labels	اليوم · التمارين · تسجيل · التغذية · التقدّم	new · approve
Today command center	kept + 3 states defined	refined · confirm
Progress language	يبدو أنك... ” · تقديري · hedged	new · approve
Qimmah+ placement	one quiet line · in-context offers	new · approve
Implementation order	tokens → welcome → onboarding → today → workout → nutrition → progress	approve to start
Brand · logo · icon · nav model	Ascent Bar · ember · 4+center	locked

APPROVAL GATE

Recommended — awaiting founder approval. On sign-off, the only next step is **Slice 0 (tokens)** behind a flag with zero visible change. No code, no push, no merge, no deploy, no production Supabase, no App Store submission.

درّج بوضوح. تقدّم بثقة.
